Education

Amrita College of Engineering and Technology

2023–2027

Bachelor of Engineering (B.E.) in Electronics and Communication Engineering

CGPA: 7.74/10

Affiliated to Anna University

Technical Skills

Programming Languages: Python, C, SQL

Tools & Platforms: Arduino IDE, Tinkercad, VS Code, Microsoft Excel, Jupyter Notebook, Google Colab

Technologies: Embedded Systems, IoT, Computer Vision, Microcontrollers

Software: MATLAB (Basic)

Concepts: Digital Electronics, Image Processing, Machine Learning Basics

Projects

Electronic Vote Polling Machine Using Arduino

2025

Arduino, Embedded Systems, Electronics

- Designed and developed an electronic voting machine using Arduino.
- Implemented vote recording and counting functionality.
- Tested system reliability and performance.
- Enhanced understanding of embedded systems and microcontroller applications.

Vehicle Number Plate Detection System

2025

Python, OpenCV, Image Processing

- Developed a system to detect and recognize vehicle number plates.
- Applied image processing and computer vision techniques.
- Improved accuracy of vehicle identification and monitoring.
- Enhanced knowledge of automation and machine learning concepts.

IoT Based Smart Monitoring System

2024

IoT, Arduino, Sensors

- Developed a smart monitoring system using IoT technologies.
- Collected and transmitted real-time sensor data.
- Enabled remote monitoring and control functionalities.
- Improved understanding of IoT communication protocols.

Internship Experience

AI & Machine Learning Intern

2025

[Srishti Innovative Educational Services Ltd]

- Worked on machine learning concepts and model development.
- Performed data preprocessing and analysis.
- Learned practical applications of Artificial Intelligence and Machine Learning.
- Assisted in project implementation and documentation.

Certifications

- Embedded System for IoT Applications using Raspberry Pi – Naan Mudhalvan Program (2025)
- Enterprise Business Process (EBPL) – HCL Career Shaper, Naan Mudhalvan Program (2025)
- Python AI/ML Internship Certification – Srishti Innovative Educational Services Ltd. (2025) “

Achievements

- Successfully completed AI/ML Internship Program.
- Developed academic projects in Embedded Systems and Computer Vision.
- Participated in technical workshops and engineering events.
